

Patient Detail:

Akmal Khokhar .

Age/Sex :

59 (Y) / M

Registration Location:

Near Jinnah Hospital, Lahore

Registration Date:

27-Oct-2025 17:26

Reference:

Patient Support Programme

Consultant:

Dr. Tariq Masood

Patient Number:

900701-25-16833084

Case Number:

17225-27-10

Note : ...

Department of Radiology

Reporting Date/Time: 27-Oct-2025 18:50

Abdominal Prostate Ultrasound

Liver is not enlarged measures 120 mm in the mid clavicular line (Normal upto 160 mm), and **shows diffuse fatty echotexture** with smooth contours. No focal lesion. Intra hepatic biliary channels are not dilated. **Portal vein** measures 8 mm and is patent.

CBD measures 3 mm.

Gall Bladder wall is of normal thickness. No stone or sludge. No mass seen.

Pancreas is normal in size, echotexture and outline in its visualized portion.

Spleen is not enlarged measures 87 mm (normal <120 mm). No mass seen.

Rt. Kidney	100 x 43 mm	Cortical thickness measuring 14 mm
Lt. Kidney	100 x 54 mm	Cortical thickness measuring 16 mm

Renal outlines are smooth. Normal cortico-medullary demarcation. No calculus, mass or hydronephrosis.

Urinary Bladder wall is thickened due to enlarged prostate , right lateral wall thickness measures 8 mm.

There is an outcoaching from the right lateral wall of the urinary bladder measuring 31 x 19 mm. No stone or mass seen .

No distanced No abdominal mass, ascites or enlarged lymph nodes seen.

No distended bowel loops, normal peristalsis.

No basal pleural effusion seen.

Prostate measures	42 x 38 x 49 mm	(39 gms) with smooth outlines
--------------------------	-----------------	-------------------------------

Prostate is enlarged. No intravesical protrusion of median lobe of prostate

Pre-void urine measures 820 ml

Post-void urine measures 562 ml --- after visiting the washroom once.

IMPRESSION	Diffuse fatty liver (Grade I). Enlarged Prostate with marked bladder outflow obstruction (PMRV 562 ml). Vesical diverticulum.
SUGGESTION	LFTs. Patient needs catheterization.

This interpretation is based on available information. Correlation with clinical assessment, previous imaging and laboratory investigations is suggested. The study can be reviewed in case of any clinical query.
