

Patient Detail:

Saira Bano .

Age/Sex :

40 (Y) / F

Registration Location:

Near Jinnah Hospital, Lahore

Registration Date:

03-Jun-2026 21:46

Reference:

Radiology OOC Discount

Consultant:

.SELF

Patient Number:

45001-26-19717497

Case Number:

17249-03-06

Note : , , ,

Department of Radiology

Reporting DateTime: 03-Jun-2026 22:11

Abdominal Ultrasound

Liver measures 172 mm in the mid clavicular line (Normal up to 160 mm), and shows **mild fatty echotexture** with smooth contours. **An iso to hypoechoic focal lesion measuring 14 x 11 mm seen in segment VIII** . Intra hepatic biliary channels are not dilated.

Portal vein measures 9 mm and is patent.

CBD is not dilated.

Gall Bladder is partially contracted (Postprandial). No stone seen.

Pancreas is normal in size, echotexture and outline in its visualized portion.

Spleen measures 118 mm (normal <120 mm). No mass seen. **An echogenic lesion measuring 7 x 6 mm in spleen, could be a granuloma.**

Rt. Kidney	106 x 36 mm	Cortical thickness measures 13 mm
Lt. Kidney	105 x 42 mm	Cortical thickness measures 13 mm

Renal outlines are smooth. Normal cortico-medullary demarcation. No calculus, mass or hydronephrosis.

Urinary Bladder is partially filled. No stone seen.

No abdominal mass, ascites or enlarged lymph nodes seen.

A para-umbilical hernia defect, measuring 5.3 mm through which omental fat is herniating out. (Reducible)

No basal pleural effusion seen.

Anteverted uterus with central endometrium 7.6 mm. No fibroid.

The uterine contour shows adhesions with the undersurface of anterior abdominal wall due to previous cesarean.

Right ovary measures 31 x 18 mm., Left ovary measures 28 x 13 mm. No adnexal cyst or mass.

IMPRESSION	Mildly enlarged fatty liver---Grade I. Focal lesion liver, could be hemangioma, however triphasic CT correlation is suggested. Splenic focal lesion, likely granuloma. Tiny para-umbilical hernia.
------------	---

This interpretation is based on available information. Correlation with clinical assessment, previous imaging and laboratory investigations is suggested. The study can be reviewed in case of any clinical query.
